The Radio HF Internet Newsletter is distributed monthly, free of charge, to subscribers by e-mail. The Newsletter is a collection of web sites specifically related to radio (AM/FM, shortwave, Internet radio, amateur radio, scanning and CB), communications, telecommunications, radio memorabilia and collectibles, media, journalism, science, technology, space and astronomy, weather, transportation, plus some fun things thrown in for good measure! Each edition includes links to web sites submitted by subscribers or by the editor. All sites are reviewed, verified and presented to you, with the URL, and a brief description of each site.

The Newsletter arrives in your in-box as an easy to read e-mail as well as an attached PDF version, with no fear of viruses. The subscriber list is secure, private and confidential. It will never be sold, redistributed or displayed.

Subscribers are encouraged to submit web sites for inclusion in future editions of the Newsletter. All contributors whose sites are published will receive a 2% discount on their next purchase from Radio H.F. The e-mail address for all contributions, comments, and subscription requests is hfnewsletter@yahoo.com

Archived editions from May 2005 to the most recent may be found at:

Welcome to the September 2016 issue the Radio HF Newsletter. We're closing in on the end of summer here in the Montreal region but for me this is one of my favourite times of the year in this neck of the woods. Cooler temperatures and less humidity provide great weather to be outside enjoying the great outdoors. However, we're already noticing the daylight hours getting shorter. For the radio DXer or amateur radio operator that usually means getting the radio shack ready for the long, cold months ahead. September is a great time to get out and check out your antenna installations, or to get some new antennas up to work with over the winter months. It looks like we're headed into a deep solar minimum so hearing interesting things from far-off places will be a challenge.

Our Monthly Special Zone for September includes web pages on International Literacy Day, International Day for the Preservation of the Ozone Layer, National POW/MIA Recognition Day, the International Day of Peace and World Maritime Day.

This month's virtual voyage around the world, in the "Where in the World Zone", takes us to central Europe to Macedonia. Officially the Republic of Macedonia, it's a country in the Balkan Peninsula in Southeast Europe. It is one of the successor states of the former Yugoslavia, from which it declared independence in 1991. A landlocked country, the Republic of Macedonia is bordered by Kosovo to the northwest, Serbia to the north, Bulgaria to the east, Greece to the south, and Albania to the west.

Let's get into this month's collection of websites. If you're spending more time at the computer and on the Internet, why not share some of your favourite websites with us. I'd be happy to include them in a future edition of the Newsletter.

What is new in books & publications from the American Radio Relay League, the Radio Society of Great Britain, and other publishers?

High Speed Multimedia for Amateur Radio
By Glen Popiel, KW5GP
Using commercial off-the-shelf equipment and developing their own software, groups of hams have created high speed wireless Amateur Radio digital networks with wide area coverage. The possible uses for these high speed data networks in the Amateur Radio community are endless. Virtually any service that works on the regular Internet can be adapted to an Amateur Radio high speed multimedia (HSMM) network, including video conferencing, instant messaging, voice over Internet protocol (VoIP), network sensors and cameras, remote station control, and many other services. With the capability to send real-time video and data files, the public service and disaster support aspects of Amateur Radio are expanded tremendously.
This book introduces HSMM networking, explains the basics of how it works, and describes the various technologies in use today. Later chapters explain in detail how to deploy your own HSMM network, along with various applications to put it to work. Well illustrated step-by-step instructions will guide you through the process of installing and configuring software needed to get your HSMM network up and running.
Product Details: Softcover: 256 pages

ARRL Operating Manual – NEW 11th Edition
The ARRL Operating Manual is recognized by radio amateurs as the trustworthy source of everything you need to know about ham radio operating–so you can get active, get involved, and get on the air. Fully updated, this edition is organized into four subject based sections to make it simple for hams of all skill level to find the information and resources they need.
Basic Station and Operating Techniques
Bridging the gap between passing the license exam and getting on the air. Includes information for putting together your first station, simple antennas, and basic operating practices on VHF and HF.
Radio Clubs and Public Service
Covers a range of group-based activities, including radio clubs, public service training, ARRL Field Day, and education outreach, where a ham can get involved with others, learn more, and participate on-air and off.
On-Air Activities and Radiosport
An in depth look at the competitive aspects of Amateur Radio: awards, DXing, QSLing, contests,

log format and submission. Includes operating techniques and basic strategy for HF and VHF contests.
Resources for the Active Ham
A collection of must-have tables, maps and other reference material for use in the amateur station.
